## Knotting

Knotting is a simple but effective way to create secure and stylish jewelry. There are many different types of knots that can be used in jewelry making, but the most common are the square knot, the overhand knot, and the surgeon's knot.

## **Square Knot**

The square knot is the most basic type of knot. It is easy to tie and very secure. To tie a square knot, follow these steps:

1. Cross the two cords over each other.
2. Take the right cord and pass it over the left cord.
3. Take the left cord and pass it under the right cord.
4. Pull both cords tight.

## **Overhand Knot**

The overhand knot is another simple and secure knot. It is often used to finish off the ends of a necklace or bracelet. To tie an overhand knot, follow these steps:

1. Make a loop with one of the cords.
2. Pass the other cord through the loop.
3. Pull both cords tight.

## **Surgeon's Knot**

The surgeon's knot is a very strong and secure knot. It is often used to attach beads or pendants to jewelry. To tie a surgeon's knot, follow these steps:

1. Cross the two cords over each other.
2. Take the right cord and pass it over the left cord.
3. Take the left cord and pass it under the right cord.
4. Pull both cords tight.
5. Repeat steps 2-4 two more times.

## **Braiding**

Braiding is a more complex technique than knotting, but it can create beautiful and intricate jewelry. There are many different types of braids that can be used in jewelry making, but the most common are the three-strand braid, the four-strand braid, and the fishtail braid.

### **Three-Strand Braid**

The three-strand braid is the most basic type of braid. It is easy to learn and can be used to create a variety of jewelry. To braid a three-strand braid, follow these steps:

1. Divide the cords into three equal strands.
2. Cross the left strand over the middle strand.
3. Cross the right strand over the middle strand.
4. Continue crossing the strands over each other until the braid is the desired length.

### **Four-Strand Braid**

The four-strand braid is a more complex braid than the three-strand braid. It creates a more intricate and interesting look. To braid a four-strand braid, follow these steps:

1. Divide the cords into four equal strands.
2. Cross the left strand over the second strand.
3. Cross the third strand over the fourth strand.
4. Cross the second strand over the fourth strand.
5. Cross the first strand over the third strand.
6. Continue crossing the strands over each other until the braid is the desired length.

## Fishtail Braid

The fishtail braid is a beautiful and unique type of braid. It
